Trade of NATO Countries With China, 1984-87¹

Intelligence Research Report

No. 191

November 17, 1988

Although the trade of NATO countries with China has been small, it continues to grow slowly in the case of most NATO countries, and it is important to China.

During the 1984-87 period (see Table I), the combined imports of all NATO countries from China, as a percentage of the NATO members' total imports, rose from 0.6 percent in 1984 to 0.7 percent in 1985 and 1986 and 0.9 percent in 1987. Exports rose from 0.8 percent in 1984 to 1.1 percent in 1985, but dropped to 0.9 percent in 1986 and 0.8 percent in 1987.

Imports of the European NATO countries remained unchanged at 0.4 percent in 1984 and 1985 and then rose to 0.5 percent in 1986 and 0.6 percent in 1987. Their exports to China, as a percentage of their total exports, increased from 0.5 percent in 1984 to 0.8 percent in 1985 and 1986 and then declined to 0.7 percent in 1987.

Table II shows imports and exports by individual countries. Between 1984 and 1987 only seven of the European NATO countries imported in any year from China more than 0.4 of a percentage
